Test Drive: Meijin graphics workstation running Autodesk 3Ds Max, Maya and V-Ray

**Moscow, October 31, 2011** – Russian hardware supplier Meijin Ltd. supported by Consistent Software Distribution today announced opening of the new demo booth based on Meijin Quadro 5000 graphics workstation running the most popular design and visualization software Autodesk 3Ds Max, Autodesk Maya, V-Ray for 3ds Max and V-Ray for Maya.

There is good news for professional computer graphic designers: a specialized demo booth is open at the sales area of Meijin. Visitors can test Meijin Quadro 5000 graphics workstation with Autodesk 3Ds Max 2012, Autodesk Maya 2012 and the well-known rendering system V-Ray preinstalled.

The demo booth can be visited October 31 - December 20, 2011. You can come to Meijin any suitable day, upload your own project or use demo objects and take the opportunity to test everything by yourself!

Meijin Quadro 5000 is designed for visualization, 3D surface and solid modeling in various industries including AEC, MFG and M&E. You can test its ease of use, evaluate the speed of rendering, determine the performance for your current work and get some advices on upgrading or choosing new hardware – just in the course of one day.

Besides Autodesk 3Ds Max and Autodesk Maya, the most popular products nowadays, you can learn about Chaos Group products at the demo booth. These are:

1. V-Ray 2.0 for 3ds Max — is a comprehensive solution for rendering, which combines the power of the distinguished V-Ray rendering engine with the flexibility and unprecedented speed of the interactive rendering system V-Ray RT GPU.
2. V-Ray 2.0 for Maya – developed to meet the needs of the most demanding VFX & Film studios around the world, the rendering engine delivers uncompromised stability, interactivity, ease of use and unprecedented speed. The resources of the Central and Graphic processors are used during the operation. Given more intellectual version will be appreciated at its true value independently from the tasks performed – from visual effects producing to architectural design. Now, V-Ray for Maya enables the rendering of even larger scenes with greater complexity and artists can rely on a faster rendering process.

Come and test for free!

Demo booth is available at the Meijin showroom located: Moscow, Rustaveli str., 1.
